

# LIST OF BUTTERS

**Butter** is a natural solid/semi-solid buttery substance derived from the beans, nuts, and seeds of the plants. It is the most popular moisturizing ingredient used extensively in making lotions, body butter, ointments, and cream for topical application.

The quality of natural cosmetic butter is determined by its aroma, consistency, absorption rate, amount of fatty acids, and sun protection factors. **Hansa Aroma Industries** offers excellent natural cosmetic butter that withstands the parameters of the users. Have a Look at Our Conventional and Unconventional Natural Cosmetic Butter!

- Aloe Butter
